

ANTO KINGSLY CHRISTOFER D

B.Tech Artificial Intelligence & Data Science | Aspiring Data Analyst | AI/ML Developer
Chennai, Tamil Nadu, India | antokingsly@gmail.com | GitHub | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Artificial Intelligence and Data Science undergraduate currently pursuing 3rd year of B.Tech, with hands-on project experience across data analytics, machine learning, artificial intelligence, NLP, and full-stack web development. Skilled in Python, SQL, data analysis, machine learning, Power BI, web development, databases, and modern development tools. Demonstrated problem-solving through national-level hackathon achievements, internship-based data science projects, and independent AI-powered applications. Seeking opportunities in Data Analytics, Data Science, Artificial Intelligence, Machine Learning, and Software Development.

EDUCATION

Bachelor of Technology — Artificial Intelligence and Data Science

Loyola Institute of Technology | Currently pursuing — 3rd Year

Relevant areas: Artificial Intelligence, Machine Learning, Data Science, Data Analytics, Database Management, Programming, Web Technologies.

TECHNICAL SKILLS

Programming & Query	Python, SQL, Java, JavaScript, TypeScript, HTML, CSS
Data & Visualization	Power BI, Pandas, NumPy, Matplotlib, EDA, Data Cleaning, Data Visualization
AI & ML	Artificial Intelligence, Machine Learning, NLP, Sentiment Analysis, Predictive Modeling, Classification, Regression
Web Development	React, Next.js, Node.js, Tailwind CSS, REST APIs, Full-Stack Development
Databases	PostgreSQL, MongoDB, Redis, SQL Databases
Tools	Git, GitHub, VS Code, Docker, Termux, REST APIs

PROJECTS

AI-Powered Disaster Management & Early Warning Platform

Technologies: React, TypeScript, FastAPI, Python, Machine Learning, PostgreSQL, PostGIS, PWA, GIS, Docker

- Developed an AI-powered platform for monitoring and predicting landslide risks using rainfall, soil moisture, IoT sensors, satellite, terrain, and historical data.
- Provides risk severity, confidence, explainable risk factors, GIS heatmaps, weather monitoring, road connectivity assessment, alerts, and GPS-based field verification.
- Supports an offline-first PWA workflow for low-network environments.
- Workflow: Detect → Predict → Warn → Verify → Respond.

BrandForgeAI — AI-Powered Brand Intelligence Platform

Technologies: Next.js, React, TypeScript, Tailwind CSS, AI APIs, Redis

- Developed an AI-powered web application for generating and analyzing brand-related content.

- Implemented responsive dashboard interfaces, AI API integration, Redis-backed persistence, and production deployment architecture.

Fake News Detection System

Technologies: Python, Machine Learning, NLP, Data Processing

- Developed a machine-learning project for identifying potentially misleading or fake news content using text preprocessing, feature extraction, classification, and model evaluation.

Amazon Review Sentiment Analysis

Technologies: Python, NLP, Machine Learning, Pandas

- Developed an NLP-based system for positive, negative, and neutral sentiment classification with text preprocessing and emotion analysis.

Car Price Prediction Using Machine Learning

Technologies: Python, Pandas, NumPy, Scikit-learn

- Built a predictive model for vehicle prices using data preprocessing, exploratory analysis, feature preparation, regression modeling, and evaluation.

Sales Prediction Using Python

Technologies: Python, Pandas, Data Analysis, Machine Learning

- Analyzed historical sales information, performed data cleaning and visualization, and applied predictive techniques to identify patterns and estimate sales.

INTERNSHIP EXPERIENCE

Data Science Intern — CodeAlpha

Completed a Data Science internship involving practical machine-learning and data-science projects.

Project work: Iris Flower Classification, Unemployment Analysis, Car Price Prediction, Sales Prediction.

Practice areas: Python programming, data preprocessing, exploratory data analysis, machine learning, data visualization, predictive modeling, and project documentation.

CERTIFICATIONS

Power BI — Simplilearn

Data visualization, dashboard development, data analysis, and business intelligence concepts.

SQL — Simplilearn

SQL queries, filtering and sorting, aggregations, joins, database querying, and data manipulation.

Full Stack Developer — Tekkisol Global

Frontend development, backend development, database concepts, web application development, and full-stack architecture.

Essential Hacking for Mobile & Laptop Troubleshooting

Device troubleshooting, system troubleshooting, basic security concepts, mobile troubleshooting, and laptop troubleshooting.

Artificial Intelligence in Project Management — Alison

Artificial intelligence concepts, AI applications in project management, AI-assisted workflows, and technology-driven project management.

ACHIEVEMENTS

1st Prize — National-Level Hackathon

St. Peter's College — Secured 1st prize in a national-level hackathon through technology-focused solution development and presentation.

3rd Prize — National-Level Hackathon

Xavier's Institute of Research and Development — Secured 3rd prize in a national-level hackathon through solution development and technical presentation.

CORE COMPETENCIES

Data Analysis • Problem Solving • Machine Learning • Artificial Intelligence • SQL & Database Analysis • Data Visualization • Python Development • NLP • Full-Stack Development • API Integration • Dashboard Development • Technical Project Development • Research & Continuous Learning • Hackathon Project Development

PROFESSIONAL INTERESTS

Data Analytics • Data Science • Artificial Intelligence • Machine Learning • Business Intelligence • NLP • AI-powered Applications • Full-Stack Development • Software Engineering
